

EDUCATION

Bachelor of Computer Applications (BCA), Computer Application

Government Degree College, Doda

2022 - 2026

PROJECTS

GetVitals

Jun 2024 - Jun 2024

<https://getvitals.netlify.app/>

I made a clean and colourful React application to track calorie intake and nutritional information.

Tech Stack:

1. Used React for front-end development with Tailwind for styling and GSAP for animations.

2. Calories Ninga API for data fetching

CodeRunner

Aug 2024 - Present

<https://github.com/Danny-Wits/CodeRunner>

I am currently working on a lightweight text editor cum code runner with simple and straight forward functionalities.

Tech Stack:

1. Using Java and its Swing Framework for GUI.

2. Maven as a build tool.

3. JPackager for packaging.

Small Coding Adventures

Jan 2022 - Present

<https://github.com/Danny-Wits>

I have built various projects in the course of learning software development. Some of the notable ones are:

1. A Neural Network (Perceptron) using Processing Java:

<https://github.com/Danny-Wits/persceptron>

2. Sorting Visualizer:

<https://danny-wits.github.io/ArraySortVisualizer-js/>

3. Data Structure and Algorithms:

<https://github.com/Danny-Wits/DSA>

4. Tic Tac Toe in Java (and pretty much in all the languages I have learned 😊):

<https://github.com/Danny-Wits/tictactoe-java>

5. Rock Paper Scissors in Python:

<https://github.com/Danny-Wits/RockPaperScissor-Python>

6. TODO SITE using React:
